

O-rings, Seal packages and Filters

O-rings

HSP Worldwide has an extensive delivery package of O-rings in stock. In addition, we provide customization, knowledge, and service. HSP Worldwide stands for O-rings. Our product range is unique, so we can supply almost every order directly from stock. Whether it is the simple black NBR O-rings, or the technologically advanced rubber compounds Viton rings, we can supply it. HSP Worldwide has the right solution for every industrial seal. You can also contact us for non-standard dimensions. HSP Worldwide can provide everything, regardless of quality and size.

Bonded Seal Packages

The bonded seal (or dowty seal) is a static seal for hydraulic connections. The bonded seal consists of a (stainless) steel outer ring with an attached rubber part on the inside, with a centering ring if necessary. You can also contact us for non-standard dimensions. HSP Worldwide can provide everything, regardless of quality and size.

Hydraulic Filters

Hydraulic filters are used to keep hydraulic oils in industrial plants pure. It is a well-known fact that in hydraulic systems, nearly 60% to 75% of all malfunctions and problems are caused by contaminated oil. Obviously, good filters in hydraulic systems are essential. HSP Worldwide can provide you with alternative high-quality filter-elements (e.g. Eaton, Mahle, Hydac, Internormen and Pall).

If you have any questions about hydraulic filters or if you have any other hydraulic related inquiries, please mail to contact@rswinternational.
